

## ABSTRAK

Tasya Putri Widyastika (2021). Asuhan Keperawatan Jiwa pada Tn. I dengan Gangguan Persepsi Sensori: Halusinasi Pendengaran di Ruangan Kuantan Rumah Sakit Jiwa Tampan Provinsi Riau. Karya Tulis Ilmiah Studi Kasus, Program Studi DIII Keperawatan Pekanbaru, Jurusan Keperawatan, Politeknik Kesehatan Kemenkes Riau. Pembimbing (I) Idayanti, S.Pd, M. Kes, (II) Hj. Rusherina, S.Pd, S.Kep, M.Kes.

Halusinasi adalah suatu gangguan jiwa dimana gangguan dari persepsi sensori khususnya pendengaran. Di Indonesia angka kejadian gangguan jiwa sebanyak 1,7 per 1000 penduduk, di Rumah Sakit Jiwa Tampan angka gangguan jiwa terdiri dari 152 orang dan di Ruangan Kuantan sebanyak 23 orang. Tujuan dari penulisan ini adalah mahasiswa mampu memberikan asuhan keperawatan Komprehensif dengan metode studi kasus yang dilakukan pada tanggal 12 – 15 April 2021. Metode penulisan adalah wawancara, observasi, dan pemeriksaan fisik. Dari pengkajian didapatkan data subjektif klien mengatakan mendengar suara-suara yang menakutkan dan memerintah untuk melakukan tindakan kekerasan, sedangkan data objektif klien tampak bicara sendiri, klien tampak senyum-senyum sendiri. Evaluasi hasil didapatkan peningkatan kemampuan klien dengan gangguan persepsi sensori: dibanding sebelum dilakukannya intervensi pada klien. Diharapkan perawat dapat melakukan strategi pelaksanaan halusinasi dan sesering mungkin melakukan kunjungan untuk dapat mengontrol pasien gangguan jiwa.

Kata Kunci: Asuhan Keperawatan, Halusinasi Pendengaran, Gangguan Jiwa

## ABSTRACT

*Tasya Putri Widyastika (2021). Mental Nursing Care in Mr. I with Sensory Perception Disorders: Auditory Hallucinations in Kuantan Room at Tampan Mental Hospital in Pekanbaru. Nursing DIII Study Program, Department of Nursing, Riau Health Ministry Polytechnic. Advisor (I) Idayanti, S.Pd, M. Kes, (II) Hj. Rusherina, S.Pd, S.Kep, M.Kes.*

*Hallucinations are a mental disorder in which sensory perception is impaired, especially hearing. In Indonesia the incidence of mental disorders as much as 1.7 per 1000 inhabitants, in The Tampan Mental Hospital the number of mental disorders consists of 152 people and in Kuantan room as many as 23 people. The purpose of this writing is that students are able to provide comprehensive nursing care which was conducted on April 12 - 15, 2021. Writing methods are interviews, observations, and physical examinations. From the assessment, subjective data was obtained where the client said to hear frightening voices and ruled to commit acts of violence, while the objective data of the client seemed to speak for himself, the client appeared to smile on his own. Evaluation of the results obtained improved client ability with sensory perception disorder: compared to before the intervention in the client. It is expected that nurses can carry out hallucinations strategy and visit as often as possible to be able to control mentally ill patients.*
