ABSTRAK

Imunisasi adalah salah satu upaya kesehatan umum yang sangat penting untuk memberikan kerentanan eksplisit terhadap infeksi yang dapat dicegah dengan imunisasi (PD3I). Kehadiran virus COVID-19 yang mempengaruhi pelaksanaan program kesehatan, khususnya pelayanan imunisasi dan surveilans PD3I. Tujuan dari Penelitian ini adalah untuk mengetahui pengaruh Pendidikan Kesehatan Dengan Media Video Edukatif Terhadap Pengetahuan Ibu Tentang Imunisasi Dasar Lengkap Di Masa Pandemi COVID-19 di Puskesmas Minas. Metode yang digunakan adalah *Pre Eksperimen* dengan desain Penelitian *One Group Pretest-Posttest*. Populasi Penelitian ini adalah seluruh ibu yang memiliki bayi usia 1 -11 bulan dengan cara *accidental sampling*. Penelitian dilakukan pada bulan Januari - Mei 2021. Uji statistik menggunakan uji *Wilcoxon* dengan derajat kepercayaan 95%. Hasil Penelitian menunjukkan bahwa ada pengaruh Pendidikan Kesehatan Dengan Media Video Edukatif Terhadap Pengetahuan Ibu Tentang Imunisasi Dasar Lengkap Di Masa Pandemi COVID-19 dengan nilai ($p= 0,000$). Diharapkan tenaga kesehatan dapat mengoptimalkan penggunaan *Video edukatif* dalam memberikan pendidikan kesehatan sebagai upaya promotif khususnya mengenai persiapan imunisasi dimasa pandemi ini.

ABSTRACT

Immunization is one of the essential public health efforts that are effective in providing specific immunity against diseases that can be prevented by immunization (PD3I). The existence of COVID-19 that occurs globally has an impact on the implementation of health programs, especially PD3I immunization and surveillance services. The purpose of this study was to determine the effect of Health Education with Educational *Video* Media on Mother's Knowledge of Complete Basic Immunization during the COVID-19 Pandemic. The method used was PreExperiment with the One Group Pretest-Posttest research design. The population of this study were all mothers who had babies aged 1 -11 months by means of purposive sampling. The study was conducted in January-May 2021. The statistical test used the Wilcoxon test with a confidence degree of 95%. The results showed that there was an effect of Health Education with Educational *Video* Media on Mother's Knowledge of Complete Basic Immunization during the COVID-19 Pandemic with a value ($p = 0,000$). It is hoped that health workers can optimize the use of educational videos in providing health education as a promotive effort, especially regarding immunization preparations during this pandemic.
