ABSTRAK

Antenatal Care (ANC) merupakan pelayanan kesehatan yang penting selama kehamilan untuk memantau kondisi kesehatan ibu dan janin serta memberikan edukasi dan pelayanan sesuai kebutuhan ibu hamil. Persepsi ibu terhadap ANC dapat memengaruhi pemahaman dan sikap ibu dalam memanfaatkan pelayanan kesehatan, termasuk keteraturan kunjungan ANC. Penelitian ini bertujuan untuk mengetahui hubungan persepsi ibu hamil terhadap *Antenatal Care* (ANC) dengan keteraturan kunjungan ANC pada ibu hamil trimester III di PMB Rosita Kota Pekanbaru Tahun 2026. Penelitian ini menggunakan metode kuantitatif dengan desain analitik observasional dan pendekatan *cross sectional*. Populasi penelitian adalah seluruh ibu hamil trimester III di PMB Rosita Kota Pekanbaru. Sampel penelitian berjumlah 30 responden yang dipilih menggunakan teknik *total sampling*. Pengumpulan data dilakukan menggunakan kuesioner persepsi dan data kunjungan ANC. Analisis data dilakukan secara univariat dan bivariat menggunakan uji Pearson *Chi-Square* dengan tingkat kemaknaan $\alpha = 0,05$. Hasil penelitian menunjukkan bahwa sebagian besar responden memiliki persepsi baik terhadap ANC, yaitu sebanyak 16 responden (53,3%), dan melakukan kunjungan ANC secara teratur sebanyak 17 responden (56,7%). Hasil analisis bivariat menunjukkan terdapat hubungan yang signifikan antara persepsi ibu hamil terhadap ANC dengan keteraturan kunjungan ANC dengan nilai p-value = 0,030 ($p < 0,05$). Terdapat hubungan yang signifikan antara persepsi ibu hamil terhadap *Antenatal Care* (ANC) dengan keteraturan kunjungan ANC pada ibu hamil trimester III di PMB Rosita Kota Pekanbaru Tahun 2026.

Kata Kunci: *Antenatal Care*, keteraturan kunjungan, persepsi ibu hamil, trimester III.

ABSTRACT

Antenatal Care (ANC) is an essential health service during pregnancy to monitor maternal and fetal health and provide education and care according to the needs of pregnant women. A mother's perception of ANC may influence her understanding and attitude toward utilizing health services, including the regularity of ANC visits. This study aimed to determine the relationship between pregnant women's perceptions of Antenatal Care (ANC) and the regularity of ANC visits among third-trimester pregnant women at PMB Rosita, Pekanbaru City, in 2026. This study employed a quantitative method with an analytical observational design and a cross-sectional approach. The study population consisted of all third-trimester pregnant women at PMB Rosita, Pekanbaru City. The sample consisted of 30 respondents selected using total sampling. Data were collected using a perception questionnaire and ANC visit records. Data were analyzed using univariate and bivariate analyses with the Pearson Chi-Square test at a significance level of $\alpha = 0.05$. The results showed that the majority of respondents had a good perception of ANC, comprising 16 respondents (53.3%), and 17 respondents (56.7%) made regular ANC visits. Bivariate analysis showed a significant relationship between pregnant women's perceptions of ANC and the regularity of ANC visits, with a p-value of 0.030 ($p < 0.05$). In conclusion, there was a significant relationship between pregnant women's perceptions of Antenatal Care (ANC) and the regularity of ANC visits among third-trimester pregnant women at PMB Rosita, Pekanbaru City, in 2026.

Keywords : Antenatal Care, ANC Visit Regularity, Pregnant Women's Perception, Third Trimester.
