ASUHAN KEBIDANAN KOMPREHENSIF PADA NY. F DI TPMB ROSITA
KOTA PEKANBARU TAHUN 2026

ix, ± 118 Halaman, 3 gambar, 9 Lampiran

ABSTRAK

Bidan berperan penting dalam memberikan pelayanan ibu dan anak secara menyeluruh dan berkesinambungan. Asuhan komprehensif ini dilakukan untuk mendeteksi dini dan mencegah komplikasi pada masa kehamilan, persalinan, nifas dan neonatus. Asuhan secara menyeluruh dan berkesinambungan pada Ny. F G2P1A0H1 diberikan di PMB Rosita kota Pekanbaru dari bulan September 2025-November 2025. Pada masa kehamilan dilakukan asuhan sebanyak 4 kali kujungan, nifas 3 kali kunjungan, neonatus 3 kali kunjungan. Pada masa kehamilan keluhan yang dialami oleh Ny. F adalah sakit pinggang ringan, diberikan asuhan sesuai kebutuhan dan masalah dapat diatasi. Asuhan persalinan sesuai dengan Asuhan Persalinan Normal (APN), bayi lahir spontan BB: 3400gram PB: 49 cm, perdarahan ±250 cc, kontraksi baik, plasenta lahir lengkap, terdapat laserasi jalan lahir derajat II. Pada kunjungan masa nifas P2A0H2 post heacting dengan masalah sedikit nyeri, ASI sudah mulai lancar dilakukan asuhan teknik menyusui, pijat oksitosin dan perencanaan keluarga, sehingga ASI lancar dan ibu akseptor KB kondom. Pada kunjungan neonatus dilakukan asuhan kebidanan bayi sehari hari, pijat bayi, terjadi peningkatan berat badan bayi sebanyak 400 gram. Diharapkan tenaga kesehatan khususnya bidan dapat melakukan asuhan kebidanan secara berkesinambungan dan berkelanjutan dimulai dari masa kehamilan, persalinan, nifas dan neonates.

COMPREHENSIVE OBSTETRIC CARE OF MRS. F AT TPMB ROSITA CITY OF PEKANBARU IN 2026

ix, ± 118 Pages, 3 Pictures, 9 Appendices

ABSTRACT

Midwives play an important role in providing comprehensive and sustainable maternal and child services. This comprehensive care is provided to detect early and prevent complications during pregnancy, childbirth, the postpartum period, and the neonatal period. Comprehensive and continuous care for Mrs. F G2P1A0H1 was provided at PMB Rosita in Pekanbaru from September 2025 to November 2025. During pregnancy, care was provided 4 times: postpartum (3 visits) and neonatal (3 visits). During pregnancy, the complaints experienced by Mrs. F were mild low back pain, care was given as needed, and problems could be overcome. Childbirth care is in accordance with Normal Childbirth Care (APN), spontaneous birth babies BB: 3400gram PB: 49 cm, bleeding ±250 cc, good contractions, complete birth placenta, there is a degree II birth canal laceration. At the P2A0H2 postpartum period visit with slight pain problems, breastfeeding has begun to be smoothly carried out, breastfeeding techniques, oxytocin massage, and family planning, so that breastfeeding is smooth and the mother accepts condom birth control. At the neonatal visit, during daily obstetric care and baby massage, the baby's weight increased by 400 grams. It is hoped that health workers, especially midwives, can provide midwifery care sustainably, from pregnancy through childbirth, the postpartum period, and the neonatal period.
